

No more reaching behind your computer to switch plugs!

Use this handy accessory for 1-touch switching between your multimedia speakers and your telephone or computer headset. Use the included double-sided tape to attach the switch to your monitor or desktop.

- 6-foot cable with 1/8" line-out and mic-in plugs

NOTE: Do not plug in a telephone headset and computer mic/headset at the same time—this will drastically reduce the sound quality of the microphone.
